Your responses to questions 1-4 and 13 should relate to the instructor of the lecture that matches your enrollment and whose name appears at the top of this form. If you did not attend lectures with this instructor, please skip questions 1-4 and 13 but respond to the other questions.

Question	Mean	StDev	P	Count	1	2	3	4	5	6
1. Did the lecturer stimulate your interest in the subject? 1 = not at all 5 = stimulated great interest; inspired independent effort	4.38	0.85		16	0	1	1	5	9	
2. Was the lecture presentation organized and clear? 1 = disorganized and unclear 5 = very organized and lucid	4.75	0.43		16	0	0	0	4	12	
3. Was the lecturer willing and available to help you overcome difficulties in this course? 1 = was of no help 5 = was very helpful	4.88	0.33		16	0	0	0	2	14	
4. Rate the overall teaching effectiveness of your lecturer compared to others at Cornell. 1 = worse than average 5 = much better than average	4.56	0.60		16	0	0	1	5	10	
5. Was the homework returned in a timely manner? 1 = never 5 = always	4.25	0.82		16	0	1	1	7	7	
6. Were the grader's comments helpful? 1 = no help 5 = very helpful	3.56	0.99		16	1	1	4	8	2	
7. How valuable were the homework assignments? 1 = taught me little 5 = extremely educational	3.81	0.72		16	0	0	6	7	3	
8. Rate the examinations in this course as a test of your knowledge. 1 = too easy, not adequate 3 = adequate 5 = too difficult, not a fair test	3.69	0.68		16	0	0	7	7	2	
9. Rate the level of difficulty of this course. 1 = too easy 5 = much too hard	3.69	0.58		16	0	0	6	9	1	
10. How suitable was the textbook? 1 = lousy 5 = great	3.19	1.07		16	1	3	6	4	2	
11. How many hours each week (on the average) did you spend on this course outside of class? 1 = 0-4 hours 2 = 5-7 hours 3 = 8-10 hours 4 = 11-13 hours 5 = 14 hours or more	3.00	0.70		16	0	4	8	4	0	
12. What was your most important reason for taking this course? (Use the answer that is closest to correct.) 1 = field or major requires it 2 = prerequisite for further courses 3 = interest in the subject matter 4 = reputation of the course 5 = reputation of the instructor 6 = distribution requirement	1.63	0.99		16	11	1	3	1	0	0

13. If you have any comments about the instructor, please include them here.

28483. Great instructor and very organized. Super willing to help students

143. Overall did a great job of teaching the class.

38837. The instructor is amazing and provides tangible example with clearly explained answers.

29236. Absolutely amazing instructor, very clear with examples and engagement and fostered a great learning environment. Was always open to clarification and made sure students had the opportunity to ask questions. Understood how to address possible confusions and used adequate yet professional language when clarifying. Probably my favorite professor this semester and it was not close.

34023. My instructor was great and really increased my morale and overall confidence about calc, I have the received the best grades I've ever gotten on exams since starting my time at Cornell and he played a great role in that.

12808. Mark was an awesome teacher and made 8:40 am lectures engaging

135. Very great instructor! The best one in Math 1120, without a doubt! Very outgoing, knew the material well, and was always willing to help.

42764. I have taken this class before and failed it so I came in uneasy. Mark did a great job filling me up with confidence and worked with me to make sure I felt comfortable. His lectures are very helpful for developing a strategy for tackling problems. It was easy to tell he cared about the course and how we all did during the semester. He was great.

2850. I think mark did a good job of creating an atmosphere where people were not afraid to ask questions. He also did a good job of helping us work together. I think more practice problems could be useful!

12758. I've now taken this class twice and the experience feels completely different. Mark actually taught us the material in a clear manner and despite the class being held really very early, I went every single time optimistic that I would learn something new.

14. Please comment on any other aspect of this course, including the lecture, textbook(s), homework, exams, course content, etc. Would you recommend this course to a friend?

No comments about the instructor in this box, please.

28483. First half of semester is good and easy to understand, but second half got really hard and confusing and lectures seemed less helpful

38837. the materials were so enganging about the course. and the homework and exam content were something related to the discussed topics.

34023. The Math 1012 course really helped with my understanding of the topic and was great practice for problems we don't see in class because we do not have the time to fully dive into each topic we cover.

135. HW was very helpful when studying for the exams. I would recommend this course to a friend.

42764. I don't think the webworks were beneficial

2850. I think that calc 2 needs to be more structured. I would study with friends from a bunch of different sections and we all learned different things in class and would have to crowd source information in order to learn everything we needed to to complete the prelims and homework. There were some subjects I was never taught that my friends were and vice versa. I think that if there was a more standardized way to teach material everyone would benefit. Additionally, the practice problems given in class were usually substantially easier than those given on the homework. This lead to spending an abundance of time in office hours and the tutoring center to try and understand concepts.
